MONTPELLIER, the 9<sup>th</sup> april 2006

Dear Partners,

I am sending you this letter to give to you some information :

1/ In September 2006, there will be a new ERASMUS teacher Coordinator for the Medical School in Montpellier :

Professeur Eric RENARD  
Maladies Endocriniennes  
Hôpital LAPEYRONIE  
371, Avenue du Doyen Giraud  
34 295 MONTPELLIER Cedex 05  
FRANCE

The administrative coordinator is still :

Pierre VIGNOLLES  
Faculté de Médecine  
Scolarité-Examens 2<sup>o</sup> cycle  
2, rue Ecole de Médecine  
34 060 MONTPELLIER Cedex 02  
FRANCE

Email : [ri-med@univ-montp1.fr](mailto:ri-med@univ-montp1.fr)

UNIVERSITE MONTPELLIER I

2/ For the coming academic years, there will be fewer students from our university who go on an ERASMUS exchange. At the end of the 6th year, all medical students in France are now required to present a new examination : "l'Examen National Classant". After this examination, they will be ranked from the 1st to the last, and they will choose the field they want to work in for the future from the first rank down. Therefore, the students are worried that if they go on an ERASMUS exchange, their chances of ranking high will be compromised compared to the students that stay in FRANCE.

3/ Our pedagogic organisation has changed : we now have only 6 modules :

Module A : Cardiology, Pneumology

Module B : Digestive, Oncology, Haematology, Dermatology

Module C : Nephrology, Endocrinology, Urology, Orthopedics, Rhumatology

Module D : Head and neck, Psychiatric

Module E : Gynecology, Pediatrics

Module F : Emergency, Internal Medicine

The specialities taught in each module can not be dissociated. Students are required to complete the whole module.

Each module corresponds to 30 ECTS.

Each module is one semester long, and they are organised with practical training in the morning, and theoretical lessons in the afternoon. The details of the courses are not ready yet. We will send them to you when they are ready.

WARNING : for module E, the practical training can only be done on pediatrics wards.

**For academic year 2006-2007 :**

**No students from september to february : transition semester for the new pedagogic organisation.**

Foreign students can come on the second semester to done only one module.

2nd semester : from February 26th 2007 to June 22nd 2007 ( examination from June 18th 2007 to June 22nd 2007 )

With my best regards from France.

Pierre VIGNOLLES
