In addition, there are afternoon activities planned including tours of the faculty and important departments, discussion forums where you can meet upper year students and get some essential information, as well as student talks with advice on getting through 1st year. INTENSIVE CZECH COURSE SYLLABUS

A very important part of the program is an introduction to the Czech language. The best way to have a smoother transition into a new living environment is to master the language. This will help you to have an easier communication with patients, learn more about the country, and more importantly help you to deal with the problems that may arise when living in the Czech Republic. This course offers an excellent opportunity to start learning the Czech language very quickly and intensively. The Czech classes will be held every morning and you can make tea or coffee during your break in the small kitchen available.

After this course, you will be able to read Czech text and understand basic phrases. You will be able to introduce yourselves as well as read and understand basic signs. You will also know Czech words for some food, drinks and furniture.

Please notice that the Czech themes taught during this week won't be repeated at the official beginning of the academic year, so that means that if you attend Freshers' Week you'll have the advantage compared to those who will not attend.
