

MIRACLE

LEUKEMIA

We are looking for 10 highly motivated PhD candidates to fill positions across our top European research centres and medical university hospitals.

MIRACLE is a Marie Skłodowska-Curie doctoral network aiming to educate a new generation of researchers optimally equipped to advance and accelerate development of novel therapeutics directed to leukemia MRD, and to progress effective treatments to the clinic.

MIRACLE will elucidate the leukemia MRD landscape by integrating the knowledge on mechanisms driving persistence of MRD from different angles, and by the subsequent design of efficient and less toxic, novel targeted combination therapy with increased capacity to induce deep responses in patients.

MIRACLE will train 10 doctoral candidates to obtain a unique combination of skills in innovative high-tech technologies, advanced data analysis tools and artificial intelligence, organ-on-chip MRD models, and drug and immunotherapy testing, and will come up with innovative ideas to advance future leukemia treatment by integration of several disciplines and data sources.

Interested to apply?

Read more about the required qualifications, what we offer, the 10 research projects and the MIRACLE consortium partners at www.miracle-leukemia.eu or at Euraxess.

Deadline 15 February 2025.

A European project funded by the European Union's Horizon Europe's Research and Innovation Program under the Marie Skłodowska-Curie Actions Grant Agreement nr. 101167512.
