

SUMMER COURSE FOR MEDICAL STUDENTS

JULY 8-12, 2019

THE ONE-WEEK SUMMER COURSE ON ADVANCES IN SELECTED AREAS OF BIOMEDICINE FOR STUDENTS OF MEDICAL FACULTIES

The course will focus on acquiring new knowledge and practical experience with biomedical research. The aim is to increase the qualification of graduates of medical faculties of the Charles University in Prague in the field of biomedical research and to increase their interest in postgraduate education.

The course will take place in three Prague institutes of the Czech Academy of Sciences (Institute of Physiology, Institute of Molecular Genetics and Institute of Organic Chemistry and Biochemistry) and will have both theoretical (lectures) and practical part (demonstrations).

The course is primarily, but not exclusively, intended for **the first and second year students**, **it will be in English and its capacity is limited to 20 participants**.

Applicants will be selected on a first come, first-serve basis. The course is free of charge and students will be provided accommodation and boarding.

Preliminary program and Application form:
