

An excellent refresher for investigators in any field of medicine or biology

Color Atlas of Genetics Fifth Edition Eberhard Passarge

2018/474 pp./183 illus./softcover
ISBN 978-3-13-241440-2
eISBN 978-3-13-241441-9
Americas \$59.99
Europe, Africa, Asia, Australia €49.99

In this fifth edition of the bestselling *Color Atlas of Genetics*, readers will be rewarded with a complete and current overview of the field, with an emphasis on the interface between fundamental principles and practical applications in medicine and the role of signaling pathways in causing diseases.

New fully illustrated topics in the revised fifth edition of the atlas include:

- An overview of disorders resulting from structural changes of the genome (genomic disorders)
- Abnormal imprinting patterns
- Examples of impaired signal pathways (laminopathies, fibrillinopathies, cohesinopathies, and others)
- The CRISPR-Cas system
- Genetic features of the aging processes
- Disorders due to rearrangements of chromatin in the cell nucleus, and others
- Acclaimed Flexibook format designed for easy visual learning and retention

With almost 200 stunning color plates explained by concise texts on the opposite pages, including tables presenting useful data, a glossary of terms, key references, and online resources, the atlas presents clear and accessible concepts.
