

**Name: New Horizons in Cardiovascular Research
B90252**

Cordinator: doc. MUDr. Štěpán Havránek, Ph.D.

Lectures: MUDr. Josef Marek
Prof. MUDr. Aleš Linhart, DrSc.
Doc. MUDr. Tomáš Kovárník, Ph.D.
Prof. MUDr. Jan Bělohávek, Ph.D.
Doc. MUDr. Josef Kořínek, Ph.D.

Date: First Tuesday Every Month from October till June, at 2 p.m.

Venue: II. Department of Internal Medicine, Cardiology and Angiology, First faculty of Medicine

Number of participants: 10

Registration on e-mail: Katerina.Novotna@vfn.cz

The course is intended for PhD students interested in research in cardiovascular issues

Annotation:

A course is focused on basic overview of current and modern trends in cardiovascular research. We are planning discuss topics of basic science and translational research according to subjects of research of course participants. All students are invited to prepare their own presentation of novel papers for discussion. The discussion will be critical analysis of data set, experimental design, statistical methods, data presentation and interpretation and formal citation of data. Course is scheduled as regular monthly meeting from October to June.
