XX

§ 9

**Special vaccination against viral hepatitis B**

**(1) Vaccination is carried out by administering three doses of vaccine to persons who:**

- a) work in the workplaces referred to in Section 16 (1), if they are active in the treatment and care of persons they are to care for,
- b) are active in low-threshold programs for drug users,
- c) are in close and regular contact with patients with viral hepatitis B or HBsAg,
- d) are not yet vaccinated and newly admitted to homes for people with disabilities or homes with a special regime,
- e) exposed to a hazardous exposition of biological material,
- f) are studying at a medical school or medical professional school, and at colleges other than faculties of medicine, with the purpose of diagnosing and treating patients in health care facilities, for students at secondary and tertiary vocational schools preparing them for social work in the investigation and treatment of persons admitted to such social care programs,
- g) provide field or outpatient social services,
- h) are newly admitted as members of the Prison Service of the Czech Republic,
- i) are enrolled in retraining courses and provide care and treatment for persons in social care facilities and health facilities, or
- j) operate in health care facilities and in social services which involve hazardous waste.

**(2) The vaccination referred to in paragraph 1 shall not be carried out in the case of a person with a proven hepatitis B virus disease or a person with an antibody titre of more than 10 IU / litre of HBsAg, as well as persons who have been shown to be vaccinated against viral hepatitis B.**
